EDUCATION

Certification

Front End Development

Codeacadem/Sololearn

📅 2021 - 2023

TECHNICAL SKILLS:

Programming Languages: HTML, CSS, JavaScript

Frontend Frameworks: React, Angular (Basic)

Version Control: Git

Responsive Design: Bootstrap

Code Editors: Visual Studio Code, Sublime Text

Web Design Tools: Adobe XD, Figma (Basic)

Web Development Tools: Chrome DevTools

Basic Knowledge of: RESTful APIs, AJAX

Objective:

As a Junior Front End Developer with five years of dedicated experience in WordPress development, my objective is to leverage my expertise to contribut to a dynamic web development team. I am committed to creating visually stunning, user-friendly websites while adhering to industry best practices. I am eager to expand my skill set, collaborate with like-minded professionals, and play a vital role in delivering exceptional web solutions that exceed client expectations. My goal is to continuously grow as a developer while making a meaningful impact on every project I'm involved in..

Projects:
Portfolio Website

Designed and developed a personal portfolio website showcasing my fronten skills.
Utilized HTML, CSS, and JavaScript to create a responsive and visually appealing design. Implemented smooth animations and transitions for enhanced user experience.

A Robo World Application

As a passionate and innovative developer, I took the initiative to create the Robo App, a cutting-edge robot control interface built using React.js and integrated with external APIs to bring robotic technology to new heights. This project exemplifies my skills in front-end development, API integration, and user experience design.

Face Recognition Brain Application

As a dedicated developer with a passion for cutting-edge technology, I proud present FaceGuard Pro, an advanced face recognition application that I conceived, designed, and developed using React.js and integrated seamless with external APIs. This project highlights my proficiency in front-end development, API integration, and my commitment to enhancing security and user experiences.

Work Experience:
Front-End Developer Apprenticeship

Schoolable

📅 January 2023 - June 2023   📍 Remote

- Assisted in building beautiful user interfaces for clients without compromising functionality for aesthetics.
- Implemented newly-learned front-end object-oriented programming to develop client server systems.
- Wrote unit tests in react. This made products 100% bug free.
- Learned and applied Agile methodologies and principles.

Leadership and Extracurricular Activities:
Vice President, Web Development Club

Actively contributed to organizing coding workshops and tech talks.
Led a team of frontend developers in a group project to create a website for a local non-profit organization.

Hackathon Participant, [stack.dev]

Developed a web application that won the "Best User Interface" award.
Collaborated with a diverse team of developers to build a functional prototype within 24 hours.

Coding Competition Participant, [Solo Learn]

Ranked in the top 10% in a regional coding competition, showcasing problem-solving and algorithmic skills.
